Wattikon Nongnamkhao

063-216-0608 | wattikorn.nongnamkhao@gmail.com | linkedin.com/in/wattikon-nongnamkhao | github.com/NIHKOOL

Education

Chulalongkorn University Aug. 2024 – May 2028
Bachelor of Engineering in Computer Engineering *Bangkok, Thailand*

Experience

AI Chatbot Backend Developer June 2026 – Aug. 2026
Korjong AI | korjong.com *Bangkok, Thailand*

- Architected an omni-channel automation pipeline via n8n to ingest incoming messages across LINE, Facebook, and Instagram.
- Integrated AI models to classify customer intent from incoming text, automatically routing requests between automated booking workflows and customer support.
- Built event-driven automation services including automated customer registration, appointment reminders, late-arrival alerts, and an AI assistant for business owners.
- Engineered backend APIs supporting the merchant dashboard, unifying omnichannel messaging, real-time calendar scheduling, customer CRM, and business analytics.

Projects

Sentinela SOC Simulator | *Python, FastAPI, SQLite, MITRE ATT&CK* | GitHub Oct. 2026

- Developed a lightweight SIEM collecting Windows Event logs (4688, 4624, 4625, 4720) across distributed hosts using a custom Python agent with simulated threat scenarios.
- Authored 10 MITRE ATT&CK-mapped Sigma detection rules with brute-force correlation, tuning rule logic to eliminate 35 false positives/hr without missing true positives.
- Built analyst triage features with entity pivoting (host/user/IP) and ±10-min event timelines, secured by API-key auth and covered by 225 automated tests.

Jolepopo 2D Action Game | *Java, JavaFX, OOP, UML* | GitHub Apr. 2025 – May 2025

- Developed a modular 2D side-scrolling action game in JavaFX featuring a 3-character switching mechanic, 4 unique enemy AI types, and a multi-phase boss fight across 5 distinct maps.
- Architected system design using strict OOP principles (interfaces, abstract classes, and UML modeling), implementing a custom 60 FPS game loop, AABB collision detection, and entity physics.
- Engineered core game systems including dynamic scene navigation, an in-game upgrade tree, audio management, and real-time debug overlays; distributed via a standalone executable JAR.

Certifications

Google Cybersecurity Professional Certificate | Google Jun. 2026 – Oct. 2026
Modules: Cybersecurity Foundations, Security Risks, Networks & Security, Linux & SQL

SOI Asia Online Course Certification | SOI Asia Apr. 2026 – May 2026
Modules: Understanding the Internet, Operating the Internet, OSPF Workshop

Aihack Thailand 2025 | AIRA & AIFUL Public Company Limited Dec. 2025
Award: Top 16 Finalist Team Certificate – LOD Prediction AI Hackathon

Leadership & Activities

- **CU Chorus Concert 2026** – Ticketing Staff *Jul 2026*
- **VidLoveVidU** – Band Leader & Vocalist *Feb 2026*
- **Show COMSAMPAN 2025** – Percussionist *Dec 2025*
- **Modchomphu Hackathon** – Welfare & PR *Oct–Nov 2025*
- **AIS Siam Co Play Night** – Content Creator *Oct 2025*
- **Hello CP52** – Registration Team *Jul 2025*
- **Rubpuen Baanjaew** – Welfare Team *Jun–Jul 2025*
- **Intania Vishnu 23rd** – Welfare Team *May–Jul 2025*
- **Intania Music Club 108 contest** – Band Leader *Mar 2025*

Technical Skills

Languages: Python, C/C++, Java, Go, JavaScript, SQL (PostgreSQL), NoSQL (MongoDB), HTML/CSS, YARA, Sigma
Frameworks & Libraries: FastAPI, Node.js, Next.js, JavaFX, Loki Scanner
Developer Tools: Git, GitHub Actions, Docker, Linux, Wireshark, VS Code, Supabase, n8n, Claude CLI
Concepts: Database Systems, Operating Systems, Computer Networks, Software Engineering, Quantum Computing
